SUMMARY

Full-stack developer and Computer Science graduate who ships TypeScript applications with React, Node.js/Express and PostgreSQL. Created a multi-tenant CRM with database-level tenant isolation, backed by 224 automated tests and 94.8% statement coverage.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, C, HTML5, CSS3

Frontend: React, Vite, responsive design, Chart.js

Backend & APIs: Node.js, Express.js, REST API design, JWT, session-based authentication, Passport.js, Google OAuth 2.0, bcrypt, role-based access control (RBAC), MVC architecture

Databases: PostgreSQL, Row-Level Security (RLS), Drizzle ORM, Supabase

Testing & Validation: Vitest, Supertest, React Testing Library, integration testing, Zod

Tools & Deployment: Git, GitHub, Docker, Render, Postman

PROJECTS

Dumb CRM | React, TypeScript, Node.js, Express, PostgreSQL, Drizzle ORM, Zod *Nov. 2026*
Live: dumb-crm-bjby.onrender.com | Code: github.com/rhythm162k/Dumb_CRM

- Developed and deployed a responsive multi-tenant CRM as a TypeScript npm-workspaces monorepo covering contacts, companies, sales deals, activities and tasks.
- Isolated each workspace's data using PostgreSQL Row-Level Security and enforced owner, admin and member permissions through role-based access control.
- Secured the API with JWT authentication in HTTP-only cookies and Google OAuth 2.0, validated requests with Zod schemas shared across frontend and backend, and added audit logging plus CSV import/export safeguards.
- Verified the API with 224 automated tests, reaching 94.8% statement and 90% branch coverage.

My Movie Diary | React, TypeScript, Vite, Node.js, Express, PostgreSQL, Passport.js *Aug. 2026*
Live: my-my-diary.onrender.com | Code: github.com/rhythm162k/my_movie_diary

- Migrated the app to TypeScript across its React frontend and Express API; deployed 11 REST endpoints on Supabase-hosted PostgreSQL.
- Implemented Passport.js authentication with Google OAuth 2.0, bcrypt password hashing, PostgreSQL-backed sessions and secure HTTP-only cookies; added rate limiting, restricted every movie operation to its owner and integrated OMDb for poster lookup.
- Wrote 175 Vitest and Supertest integration tests against an isolated test database, with 99.5% statement and 97% branch coverage on the API; containerized the app with Docker for local development.

First Cost | JavaScript, OOP, MVC, Chart.js *Jun. 2026*
Live: rhythm162k.github.io/First-Cost | Code: github.com/rhythm162k/First-Cost

- Designed a client-side personal finance tracker using MVC: one model, one controller and 10 view classes extending a shared base class.
- Built multi-account tracking, three transaction types, filtering, a four-metric dashboard and two Chart.js visualizations; persisted data in localStorage and published the app on GitHub Pages.

EDUCATION

Daffodil International University, Dhaka, Bangladesh *Jan. 2026*
B.Sc. in Computer Science & Engineering | GPA: 3.72/4.00
Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, AI/ML

TRAINING

AWS Cloud Practitioner Essentials (course) *Sept. 2026*
