MD. SAMI-EL BASHAR RHYTHM

Mymensingh, Bangladesh | +880 1747153895 | mdsamielbashar@gmail.com | GitHub | LinkedIn | Portfolio

SUMMARY

Junior full-stack developer and Computer Science graduate with hands-on experience building and deploying TypeScript applications using React, Node.js/Express and PostgreSQL. Developed a multi-tenant CRM with database-level tenant isolation and role-based access control, alongside a movie-tracking app; the projects include 224 and 120 automated tests, respectively.

TECHNICAL SKILLS

Languages & Frontend: TypeScript, JavaScript (ES6+), React, Vite, HTML, CSS
Backend & APIs: Node.js, Express.js, REST APIs, JWT, session-based authentication, Google OAuth 2.0, bcrypt
Databases & Infrastructure: PostgreSQL, Drizzle ORM, Supabase, PostgreSQL Row-Level Security (RLS), Docker, Render
Validation, Testing & Tools: Zod, Vitest, Supertest, React Testing Library, integration testing, Git, GitHub, Postman
Foundations: Object-oriented programming, MVC, data structures & algorithms

PROJECTS

Dumb CRM | React, TypeScript, Node.js, Express, PostgreSQL, Drizzle ORM, Zod *Nov. 2026*
Live Demo | GitHub Repository

- Built and deployed a TypeScript full-stack CRM in an npm-workspaces monorepo, supporting contacts, companies, sales deals, activities and tasks.
- Implemented multi-tenant workspace isolation with PostgreSQL Row-Level Security and role-based permissions for owners, admins and members.
- Added JWT authentication with HTTP-only cookies, Google OAuth, shared Zod validation, audit logging, CSV import/export safeguards, and 224 automated tests.

My Movie Diary | React, TypeScript, Vite, Node.js, Express, PostgreSQL, Passport.js *Aug. 2026*
Live Demo | GitHub Repository

- Converted the full-stack application to TypeScript across its React frontend and Express API; deployed 11 REST endpoints backed by Supabase-hosted PostgreSQL.
- Implemented PostgreSQL-backed sessions, secure HTTP-only cookies, bcrypt password hashing and Google OAuth 2.0; integrated OMDb poster lookup and user-scoped movie operations.
- Wrote 120 Vitest/Supertest integration tests against an isolated PostgreSQL test database; containerized the application for local development with Docker.

First Cost | *JavaScript, OOP, MVC, Chart.js* *Jun. 2026*
Live Demo | GitHub Repository

- Developed a client-side personal finance tracker using an MVC architecture with a model, controller and 10 view classes built on a shared base Views class.
- Implemented multi-account tracking, three transaction types, filtering, a four-metric dashboard and two Chart.js visualizations; persisted data in localStorage and deployed with GitHub Pages.

EDUCATION

Daffodil International University Dhaka, Bangladesh
B.Sc. in Computer Science & Engineering | GPA: 3.72/4.00 *Jan. 2026*
Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, AI/ML

ADDITIONAL TRAINING

AWS Cloud Practitioner Essentials (training course) *Sept. 2026*
