MD. SAMI-EL BASHAR RHYTHM

Mymensingh, Bangladesh | +880 1747153895 | mdsamielbashar@gmail.com | GitHub | LinkedIn | mdsamielbashar.com

SUMMARY

Full-stack developer and Computer Science graduate (B.Sc., GPA 3.72/4.00) who builds, tests and deploys TypeScript applications with React, Node.js/Express and PostgreSQL. Built a multi-tenant CRM with database-level tenant isolation and role-based access control, backed by 224 automated tests and 94.8% statement coverage.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, C, HTML5, CSS3

Frontend: React, Vite, responsive design, Chart.js

Backend & APIs: Node.js, Express.js, REST API design, JWT, session-based authentication, Passport.js, Google OAuth 2.0, bcrypt, role-based access control (RBAC)

Databases: PostgreSQL, Row-Level Security (RLS), Drizzle ORM, Supabase

Testing & Validation: Vitest, Supertest, React Testing Library, integration testing, Zod

Tools & Deployment: Git, GitHub, Docker, Render, Postman

Foundations: Object-oriented programming, MVC, data structures & algorithms

PROJECTS

Dumb CRM | React, TypeScript, Node.js, Express, PostgreSQL, Drizzle ORM, Zod *Nov. 2026*
Live Demo | GitHub Repository

- Built and deployed a multi-tenant CRM with a responsive React UI in a TypeScript npm-workspaces monorepo, covering contacts, companies, sales deals, activities and tasks.
- Isolated each workspace's data at the database layer with PostgreSQL Row-Level Security, and enforced owner, admin and member permissions through role-based access control.
- Secured the API with JWT authentication in HTTP-only cookies and Google OAuth 2.0; shared Zod schemas across frontend and backend, and added audit logging and safeguards for CSV import and export.
- Verified the API with 224 automated tests, reaching 94.8% statement and 90% branch coverage.

My Movie Diary | React, TypeScript, Vite, Node.js, Express, PostgreSQL, Passport.js *Aug. 2026*
Live Demo | GitHub Repository

- Migrated the full-stack app to TypeScript across its React frontend and Express API, and deployed 11 REST endpoints backed by Supabase-hosted PostgreSQL.
- Implemented authentication with Passport.js: Google OAuth 2.0, bcrypt password hashing, PostgreSQL-backed sessions and secure HTTP-only cookies; added rate limiting, scoped all movie operations to the signed-in user and integrated OMDb for poster lookup.
- Wrote 175 Vitest and Supertest integration tests against an isolated PostgreSQL test database, reaching 99.5% statement and 97% branch coverage on the API; containerized the app with Docker for local development.

First Cost | JavaScript, OOP, MVC, Chart.js *Jun. 2026*
Live Demo | GitHub Repository

- Designed a client-side personal finance tracker on an MVC architecture: one model, one controller and 10 view classes extending a shared base View class.
- Built multi-account tracking, three transaction types, filtering, a four-metric dashboard and two Chart.js visualizations; persisted data in localStorage and deployed to GitHub Pages.

EDUCATION

Daffodil International University, Dhaka, Bangladesh *Jan. 2026*
B.Sc. in Computer Science & Engineering | GPA: 3.72/4.00
Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, AI/ML

TRAINING

AWS Cloud Practitioner Essentials (training course) *Sept. 2026*
