MD. SAMI-EL BASHAR RHYTHM

Mymensingh, Bangladesh | +880 1747153895 | mdsamielbashar@gmail.com | GitHub | LinkedIn | Portfolio

SUMMARY

Junior full-stack web developer with hands-on experience in JavaScript, React, Node.js, Express and PostgreSQL. Built and deployed a full-stack application featuring session-based authentication, Google OAuth 2.0 and 111+ automated integration tests, while also gaining practical experience with Docker through local application containerization. Focused on developing reliable web applications and strengthening backend and full-stack engineering skills.

TECHNICAL SKILLS

Languages & Frontend: JavaScript (ES6+), React, Vite, HTML, CSS, responsive design

Backend & APIs: Node.js, Express.js, REST APIs, session-based authentication, OAuth 2.0 (Passport.js), bcrypt, rate limiting

Databases & Infrastructure: PostgreSQL, Supabase, relational schema design, parameterized queries, Docker

Testing & Tools: Vitest, Supertest, React Testing Library, integration testing, API mocking, Git, GitHub, Postman

Foundations: Object-oriented programming, MVC, data structures & algorithms

PROJECTS

My Movie Diary | *React, Vite, Node.js, Express, PostgreSQL (Supabase), Passport.js* *Aug. 2026*

Live Demo | GitHub Repository

- Built and deployed a full-stack movie-tracking application with a React/Vite frontend and an Express REST API comprising 11 endpoints, backed by Supabase-hosted PostgreSQL.
- Implemented PostgreSQL-backed sessions, secure httpOnly cookies, bcrypt password hashing and Google OAuth 2.0; protected movie routes from unauthenticated access.
- Designed user-scoped relational data access with parameterized SQL; integrated the OMDb API for poster lookup and handled duplicate movie entries with case-insensitive conflict detection.
- Wrote 111+ integration tests using Vitest and Supertest against an isolated PostgreSQL test database, covering authentication, authorization, validation, CRUD and error handling; containerized the app for local development with Docker.

First Cost | *JavaScript, OOP, MVC, Chart.js* *Jun. 2026*

Live Demo | GitHub Repository

- Developed a client-side personal finance tracker using an MVC architecture with a model, controller and 10 view classes built on a shared base Views class.
- Implemented multi-account tracking, three transaction types, filtering, a four-metric dashboard and two Chart.js visualizations; persisted data in localStorage and deployed with GitHub Pages.

EDUCATION

Daffodil International University Dhaka, Bangladesh

B.Sc. in Computer Science & Engineering | GPA: 3.72/4.00 *Jan. 2026*

Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, AI/ML

ADDITIONAL TRAINING

AWS Cloud Practitioner Essentials (training course) *Sept. 2026*
