EDUCATION

Daffodil International University Dhaka, Bangladesh
B.Sc. in Computer Science & Engineering *Jan. 2026*

- GPA: 3.72/4.0
- Relevant coursework: Data Structures & Algorithms, Object Oriented Programming, AI/ML

PROJECTS

My Movie Diary | *React, Vite, Node.js, Express.js, PostgreSQL (Supabase), Passport.js*
Live Demo | GitHub Repository *Aug. 2026*

- Built and deployed a multi-user movie diary with a React/Vite frontend and a Node.js/Express RESTful API (10 endpoints) backed by Supabase-hosted PostgreSQL.
- Modeled a relational schema (users, movies, PostgreSQL-backed sessions) with parameterized SQL queries scoped to the signed-in user; the movie-list endpoint responds in ~99 ms (warm, measured in Chrome DevTools).
- Secured accounts with PostgreSQL-backed sessions (httpOnly, secure and sameSite cookies), bcrypt hashing (15 salt rounds) and Google OAuth via Passport.js; unauthenticated requests to movie routes receive 401.
- Integrated the OMDb API for poster lookup with a fallback poster, and blocked duplicate entries with a case-insensitive check returning 409 Conflict.
- Shipped to Render with production CORS, environment-based configuration and SPA routing.

First Cost | *JavaScript, Object-Oriented Programming, MVC, Chart.js*
Live Demo | GitHub Repository *Jun. 2026*

- Architected a client-side personal finance tracker in JavaScript using MVC, with a model layer, a controller and 10 view classes extending a shared base Views class.
- Built multi-account tracking with 3 transaction types, filtering by 3 criteria, a 4-metric dashboard and 2 Chart.js charts, persisted in localStorage and deployed to GitHub Pages with a single-command Parcel build.

TECHNICAL SKILLS

Backend: Node.js, Express.js, RESTful API design, Object-Oriented Programming (OOP), authentication and security (session-based auth, OAuth 2.0, bcrypt, secure cookies, CORS)
Databases: PostgreSQL, SQL, relational schema design
Frontend: React, JavaScript, HTML, CSS
Testing: Vitest, Supertest, React Testing Library
Tools & Workflow: Git, GitHub, Render, environment-based configuration

ADDITIONAL

AWS Cloud Practitioner Essentials *Sept. 2026*
